

DUSTY DIRTY WAREHOUSE FLOORS DONT STAND A CHANCE.

MEET THE *New* POWERBOSS INDUSTRIAL CLEANING EQUIPMENT

NEW PRODUCT LINE-UP

PowerBoss' whole new product line-up offers a wide variety of products for your industrial facility. These tough machines are built to last and built to power through your cleaning needs. Eight series form a full line of sweepers, scrubbers and combination sweeper/scrubbers that will leave your industrial facility clean and pristine.

NEW COLOR

The NEW PowerBoss product line-up puts safety and quality first. In a busy industrial environment, the highly visible orange machine colors are easy to detect, promoting a safer work place, and keeping your employees from harm. Also, look for the orange checkmark on all PowerBoss machines. This symbol is to ensure that each piece of equipment is checked for safety and quality.

NEW EQUIPPED WITH AQUA-STOP TECHNOLOGY

The NEW PowerBoss has joined the "Blue Movement"; a commitment promoting cleaner air, water conservation, and a safer work environment. New "Blue" features of PowerBoss include; high-performance filter systems to reduce dust and debris in the air, Tier 2 Emission specifications on all gas & LP engines, and parabolic squeegees that leave the cleaning path virtually dry for safer traffic. PowerBoss also uses Aqua-Stop; a new brush technology that saves 50% on water and chemical use.

Look for the Aqua-Stop symbol on the "Phoenix 26", and "Admiral 30", "32", "36" & "42". More to come!
